

Don't let freezing weather take a bite out of the backflow valve assembly in your water system.

With a WeatherGuard Blanket you have a cost effective solution.

The Weather Guard Blanket was designed for and in conjunction with a major California municipal water district, and has been tested and certified by California Irrigation Technologies.

Features

- Insulation so dense that it safeguards against freezing down to 0 degrees Fahrenheit.
- Weatherproof canvas so durable that the entire blanket is warranted for five years.
- Construction so complete that space for venting any water discharge is part of the package
- Installation so easy that year-round access for servicing and testing of valve and ball cock components is no chore.

Specifications

Fabric: Calliope or tempotent Polymeric Resin Coated Polyester, a 100% polyester plain with heat sealable pigment coating. Standard colors of either forest green or emerald green; option of 18 colors. Weight of 12.5 ounces per square yard. Water and mildew resistant. Flame resistant to California State Fire Marshall CPA1-84, UL Small/Large and NFPA Small/Large Standards.

Insulations: Fiberglass, compression packaged. Standard R-values of R-13; option of R-19, R-22, R-30, and R-38.

Construction: Blankets come with brass grommets for locking capability. Machine stitched with metal grommet reinforcement for installation of an individual lock.

Guarantee: Manufacturer's five year limited warranty.

Sizes: 20"x15", 34"x19", 45"x22", 4'-6"x4', 6'-7"x4'6", 7'-9"x5', 9'-11"x5'
